Full Stack Developer

You can get a lot of money back with tax declarations, but it's complicated, time-consuming and no one really understands them.

We are on a mission to change that: With specialized tax tools and modern UX, we are currently reinventing the whole tax industry.

We are looking for a Full Stack Developer to start immediately in our cosy loft in the center of Kreuzberg, Berlin.

What you will do

- Driving technical decisions with an experimental and data-driven mindset
- Writing and reviewing beautiful code
- Take part in the agile & lean process and evaluate how to collaborate better
- Work closely together with designers, product-managers and tax-experts to create an awesome user experience

You'll need to have

- Working experience with Ruby on Rails and a solid understanding of the best practices
- Experience in writing reusable Ruby libraries that may be used in expressive ways
- Proficiency in current web technologies (HTML, (S)CSS, Javascript, React, ...)
- Discipline in writing clean and well tested code
- Good understanding of code versioning tools (git)
- Experience with relational databases and SQL
- (optionally) Knowledge of client side testing frameworks (eg. Jasmine)

How are we different?

- We work together as a team: knowledge & experience is shared all the time
- We believe that a diverse team will create a better product
- We deploy our Rails 5 app continuously multiple times per day
- We improve our code quality day by day
- We base our decisions on quantitative and qualitative data
- We believe in a healthy work-life balance

Sounds good?

You don't need a perfectly crafted CV or cover letter. Instead, just tell us in a brief email about you and the most important things we should know about you. We reply fast. Please send your mail to product@wundertax.de

We especially encourage people from underrepresented groups to join us.
