Intern in Software Development

Taxes suck. You can get a lot of money back with tax declarations, but it's complicated, time-consuming and no one really understands them.

With specialized tax tools and modern UX, we are currently reinventing the whole tax industry.

Job Description

How are we different?

• We work together as a team: knowdledge & experience is shared all the time
• We believe that a diverse team will create a better product
• We deploy our Rails 5 app continuously multiple times per day
• We improve our code quality day by day
• We base our design decisions on multiple thousand data points
• We talk A LOT about taxes :)

What you will do

You will join us from day 1 in our daily work. You will be part of our team and you will pair most of the time with one of our developers. You will get a better understanding in Ruby, Ruby on Rails, Javascript and (S)CSS and of course get a lot of insights how our software development team is organized and how to ship good quality code.

The internship last for 4 months.

There will be a possibility to extend the internship to a traineeship after 4 months.

You'll need to have

• Very good communication skills. You ask a lot of questions and help the team to take good decisions.
• Basic understanding of Ruby and Ruby on Rails. You are able to create a simple Rails Application from scratch.
• Basic understanding of HTML, (S)CSS and Javascript. You are able to create a simple static page from scratch.
• Experience with german tax system is a big plus, but not necessary

Apply now

You don't need a perfectly crafted CV or cover letter. Instead, just tell us in a brief mail about you and the most important things we should know about you. We reply fast. Please send your mail to jalyna@wundertax.de

We especially encourage people from underrepresented groups to join us.
